Abdulrahman Mohammed Amin

Front-End Developer

+201060651707| eeaarrssnn40@gmail.com | Egypt, Cairo |LinkedIn| GitHub | Military Service Status: Completed

SUMMARY

Highly skilled Front-End Developer specializing in creating dynamic and responsive user interfaces using Angular. Adept at optimizing front-end performance for enhanced user engagement and solving scalability challenges. Proven success in collaborating with back-end teams to streamline development, reduce integration time, and ensure seamless deployments. Passionate about continuous learning and leveraging modern technologies to improve the user experience.

EDUCATION

Bachelor's Degree in Information Systems(2022), Faculty of Computers and Information, Minia University

PROJECTS

Car Rent Demo

- Developed a fully-functional car rental application using Angular framework, aimed at providing a seamless user experience for renting cars online.
- Designed and implemented the front-end architecture using Angular to ensure high performance and responsive design.

Book Store Demo

- Developed a comprehensive web application for selling books using Angular and Angular Material. The project includes full CRUD functionalities, user authentication, and secure payment integration. It features a responsive design, providing an intuitive and seamless user experience across all devices. The application interacts with a real API for data management and supports functionalities like login, registration, password management, and secure transactions.

User Management System (UMS) Demo

- Developed a fully functional user management system with features like adding, deleting and updating users Integrated real-time API calls for users' data. This is a simple User Management System built with Angular. It uses Dummy JSON as a backend, implements JWT authentication, and displays notifications with ngx-toastr, ensuring smooth user experience and fast rendering times.

GRADUATIONPROJECT

Invest in Egypt

Objective: an innovative web application designed to bridge the gap between service seekers and service providers. The platform allows users to either request a service or offer their services, facilitating seamless connections and efficient transactions between parties. Key features include user registration, service listings, real-time communication, and secure payment processing. The application ensures a user-friendly experience with a responsive design, making it accessible and convenient for all users.

Responsibilities: **Design the website layout and the user interface using HTML, CSS, and JavaScript.**

Languages

1- Arabic : Native.   2 - English: Good.
